SUMMARY

Software Developer with 5 months of internship experience, Term 2 Co-op Computing student at BCIT, GPA: 92

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, C#, HTML/CSS, SQL
Tools/Frameworks/Library: React, Node.js, Next.js, ASP.NET Core, Entity Framework, AWS

WORK EXPERIENCE

Web Developer Intern, Cube Design and Communication   Feb 2023 – May 2023
- Redesigned a company website in Vue.js and Firebase connected to Google Domain, resulting in a 19% increase in LinkedIn followers.
- Implemented multilingual support with an internationalization plugin, Vue I18n.
- Built a contact form with email functionality using Elastic Email SMTP API.
- Managed project progress with a team using Agile Scrum methodology, Slack, and Git.
- Designed and developed a company introduction website using WordPress.

IT Support Intern, Vancouver Fashion Week   Jan 2023 – Feb 2023
- Created websites in Wix for upcoming FW 2023 by resolving issues with designer registration forms using Wix Event.
- Collaborated with the team to troubleshoot technical issues for a seamless user experience.

TECHNICAL PROJECTS

Study Buddy | School Team Project - Project Manager | GitHub, Demo   Sep 2024 – Dec 2024
- HTML/CSS, Tailwind, JavaScript, DOM Manipulation, Firebase
- Worked in a 3-member team to develop a study tracking app to help students log study hours and manage their time effectively.
- Implemented a custom stopwatch using asynchronous logic to log study sessions and a dynamic calendar to display study statistics to improve students' time management.
- Led the team as a Project Manager to make the critical decisions in terms of database design, assigning tasks and mentoring team members in JavaScript and Firebase.

Slack Message Archive | Personal Project | GitHub   Aug 2023 – Sep 2023
- TypeScript, React, Redux Toolkit, Node.js, Express.js, MongoDB, Slack Events API, ngrok
- Developed a web-based app to store Slack messages in real-time and provide permanent access.
- Implemented infinite scrolling along with message search by date using react-calendar library.
- Managed changes to new, edited, or deleted original messages using Slack Events API.

Language Exchange | Personal Project | GitHub, Demo   Jun 2023 – Jul 2023
- TypeScript, React, Mobx, C#, ASP.NET Core, MSSQL, Docker, Github Actions, Azure
- Developed a web app to connect students with native speakers, featuring a real-time SignalR chat with a Translation API to auto-detect and translate messages to the user's native language.
- Optimized the process of finding language practice partners with search by last activity and location using Google Maps API and Geocoding API to connect users with nearby partners..
- Implemented infinite scrolling with caching to Azure Cache for Redis to memoize data, along with user profile picture cropping and storage in Azure Blob Storage.

EDUCATION

Computer Systems Technology Diploma, GPA: 92/100   Sep 2024 – (Expected) Jun 2026
British Columbia Institute of Technology | Vancouver, BC

Web Developer Certificate, GPA: 97/100   Aug 2022 – Jun 2023
Tamwood Careers College | Vancouver, BC
